

Case Mix Index (CMI) Analysis

Is your case mix index (CMI) healthy? Are you capturing the MS-DRG levels that pay for the quality care you provide? We will analyze your hospital's CMI and compare trends to:

- the hospital performance over a period of time
- other similar hospitals in the state or region
- hospitals nationwide

Bring your coding and clinical documentation to Blue for a check-up today. We can provide a prescription for revenue cycle fitness and help your CMI remain robust. Invigorate your health information, optimize your MS-DRGs and pump up confidence in your coding compliance. Our focus on the Lean approach can move your system into a position of staying power. We tailor our approach to your needs to boost clinical documentation, coding and your Health Information Management (HIM) department.

Our experts will identify, analyze, implement, educate, measure and monitor the following areas:

- Inpatient and Outpatient Coding Quality and Compliance
- MS-DRG Accuracy
- CMI Health Analysis
- Clinical Documentation Improvement (CDI) Process Consulting
- Health Information Management (HIM) Department Process Improvement
- Coder Education

We are responsive. We are caring. We are advocates.
