

## Clinical Documentation Improvement (CDI) Consulting

Blue's Clinical Documentation Improvement solution significantly improves clinical documentation, ensuring that it fully and accurately reflects the severity of illness, complexity of care, and resources consumed. Our comprehensive program bridges the gap between clinicians and the coding and billing system, increasing and capturing appropriate reimbursement for services provided.

Our Clinical Documentation Improvement team brings more than 30 years of collective experience to every engagement including documentation coding and utilization review. Our team is composed of certified coding and credentialed Clinical Documentation Improvement Professionals along with utilization review nurses who are experts in physician coding and reimbursement. We can provide the tools, strategies, and skills necessary for you to achieve the most accurate documentation and coding.

We work collaboratively to:

- Design a comprehensive clinical documentation program
- Transfer the knowledge needed to achieve organizational goals
- Provide follow-up services to ensure sustainability

Our depth of experience in documentation improvement results in more compliant documentation, and improvement in third-party reimbursement. Our commitment to results and our ability to work collaboratively to consistently exceed client expectations.

Please contact Lynette Thom, RHIT, CDIP and AHIMA Approved ICD-10-CM/PCS Trainer at 317-713-7926 or [lthom@blueandco.com](mailto:lthom@blueandco.com) to discover how Blue & Co., LLC can help your organization.
